

set yourself free

For just a few dollars a day you can seamlessly access and synchronize all your mailbox data, including contacts and calendar, across a variety of platforms and mobile devices.

total mobility

If you typically use Microsoft Outlook 2003 while in the office, a BlackBerry or Treo handheld while on the road, and Outlook Web Access from home, you can sync them all together. That's without ever worrying about missed e-mails, contacts or appointments — quality assured. Phone calls are randomly recorded and monitored by a trained quality-assurance team.

improved mobile access

Hosted Microsoft Exchange Server 2003, and 2007, offers all the features and functionality of the popular application plus an intuitive collaboration capability for improved productivity with anywhere, anytime access.

increase your productivity

- + be set free with generous disk space ranging from 250 MB to 15,000 MB per mailbox
- + collaborate easily and securely with co-workers, customers and suppliers
- + schedule meetings with your co-workers
- + share files, e-mails, contacts and calendars across the company
- + edit, add and delete appointments on other users' calendars
- + eliminate scheduling conflicts for resources such as meeting rooms, equipment, etc.
- + filter unwanted messages before they get to your mailbox with spam software (client and server-side)

Key benefits include

work anytime, anywhere

Get full access to all your e-mail folders, contacts, calendar and files from any Microsoft Outlook or browser.

keep up-to-date

Changes made to your e-mails, contacts, calendar and files are automatically updated when accessed via any other medium.

mobile access

Carry your contacts, calendar, notes and task list on the road in your PDA, whether it's a BlackBerry, Compaq, Dell, Handspring or Palm, etc.

work offline

Exchange e-mail, change contacts, schedule meetings and modify files from public folders while disconnected from the internet or offsite. Outlook keeps an offline copy of it all, and all offline-mode changes are synchronized.

save money

- + save thousands of dollars by not having to purchase licenses for Microsoft Exchange Server 2007.
- + eliminate the need to purchase backup software and tapes, or antivirus software.
- + software updates are handled automatically on the servers, at no charge to you.

maintain data security

- + be secure with an enterprise-managed firewall, which includes packet inspection and intrusion detection.
- + be protected by automatic virus checks on all inbound and outbound e-mails and their attachments.
- + be confident that your valuable company data is in a secure data center, one also used by the NYSE.
- + be sheltered because data is backed up daily — no more data loss.
- + be safe, knowing we keep up with the latest security holes used by hackers; your data is always secure.

BlackBerry Enterprise Server

- + two-way wireless synchronization
- + anytime, anywhere access to all your e-mail folders, files, contacts and calendar
- + view attachments directly from a handheld device

efficient Messaging Server

- + complete, real-time wireless synchronization, without the use of a cradle
- + wirelessly synchronize your e-mail, calendar, contacts, notes, tasks, public folders, access to your Global Address List (GAL)
- + end-to-end security via 3DES and AES encryption
- + constantly updated so your information is always up to date

about Loop

Loop Enterprise Inc. was founded in March 1995 in response to the IT industry demand for a single-point solution provider who understands workflow. Loop's team of professionals focus on implementing hardware/software solutions that increase productivity and minimize downtime and cover all technologies, from networking and server infrastructure to overall workflow.

Over the years, Loop has expanded its product and service offerings and continues to do so today in order to proactively respond to client needs, providing them with products and services that ensure optimal and uninterrupted levels of productivity.

Loop also specializes in customized training for software applications and has several certified trainers on staff as well as a network of training partners. Training needs are assessed on a client by client basis and the content and format of each training session is developed to address the client's specific requirements.

Loop is not only an IT product and service provider, Loop is an IT partner who strives to deliver a personalized service to each and every client and become part of the client's ongoing success.
