

instant, uninterrupted recovery services

Can you be sure of having access to the critical applications and data you need to keep your business running after a system failure, unplanned outage or disaster? With [Instant Recovery on Demand](#), you can.

A highly sophisticated and powerful business-continuity and disaster-recovery (BC/DR) service, [Instant Recovery on Demand](#) offers secure, real-time, WAN-optimized continuous replication from your primary servers to 'standby' servers at our remote, secure top-tier data center. In the event of a failure, [Instant Recovery on Demand](#) automatically redirects your workers to our remote site for seamless continuity of operations.

multiple platforms supported

This service supports Microsoft Windows Server, Exchange Server, SQL Server and IIS Web server, as well as Oracle, BlackBerry and other 32-bit and 64-bit Windows applications.

Whether your applications are running on physical servers or virtual servers such as VMware, Microsoft Hyper-V, Virtual Iron or Citrix XenServer, our instant recovery service will ensure your business continues without disruption.

get started

[Instant Recovery on Demand](#) can be deployed in less than 24 hours with no hardware or software purchase requirements. Contact us today, and your business could be safe from disaster by tomorrow.

service features

- + real-time data replication ensures access to the most up-to-date information.
- + scheduled and automated failover redirects employees to failover system with little to no impact.
- + automated, non-disruptive disaster recovery testing ensures failover systems and applications are available for use without disrupting the production or disaster recovery environments.
- + remote, non-disruptive deployment keeps your business going during deployment process

about Loop

Loop Enterprise Inc. was founded in March 1995 in response to the IT industry demand for a single-point solution provider who understands workflow. Loop's team of professionals focus on implementing hardware/software solutions that increase productivity and minimize downtime and cover all technologies, from networking and server infrastructure to overall workflow.

Over the years, Loop has expanded its product and service offerings and continues to do so today in order to proactively respond to client needs, providing them with products and services that ensure optimal and uninterrupted levels of productivity.

Loop also specializes in customized training for software applications and has several certified trainers on staff as well as a network of training partners. Training needs are assessed on a client by client basis and the content and format of each training session is developed to address the client's specific requirements.

Loop is not only an IT product and service provider, Loop is an IT partner who strives to deliver a personalized service to each and every client and become part of the client's ongoing success.
