

### what it does

**Threat Manager's** hosted network security solution provides a critical layer of network defense against threats that can easily bypass perimeter and endpoint defenses.

Designed to ensure compliance, **Threat Manager** improves service levels and increases your satisfaction by constantly protecting your internal networks from viruses, worms, botnets, Trojans and other threats brought in by roaming laptops, VPN connections, wireless access points, partner portals and other 'trusted' sources.

### why threat manager?

Even though most organizations use perimeter defenses (firewalls) and employ endpoint defenses (antivirus software), many corporations still experience ongoing security breaches. This means that your internal networks could still be at risk, in spite of the defenses you have in place. As a response, **Threat Manager** improves network security while ensuring compliance with policies and regulatory mandates.

### advanced threat scenario model

With an expanded threat management approach that exceeds typical intrusion-detection and prevention products, **Threat Manager** allows you to maximize your technical resources by eliminating false-positive incidents and reducing associated IT costs.

### no assembly required

With no software or hardware to purchase or maintain, and no upfront investment required, **Threat Manager** eliminates the burden of deployment, configuration and maintenance. All application capability is delivered through a browser, which provides you with a greater level of network security at an affordable price.

Key solution capabilities include...

#### intrusion protection

- + identifies and protects against over 12,000 threats
- + passively monitors network traffic
- + multilayered architecture enables superior protection

#### vulnerability management

- + continuous asset discovery, vulnerability assessment
- + on-demand scheduling flexibility for scanning
- + comprehensive prioritization and resolution workflow management

#### compliance automation

- + integrated PCI certification scanning included
- + comprehensive compliance reporting and dashboards in PCI, GLBA, SOX, and HIPAA

### Active Watch

**Active Watch** allows you to receive alert updates by phone or e-mail from GIAC-certified security professionals in our Security Operations Center (SOC), which monitors the network 24/7 with a customized escalation response based on compliance requirements and end-user preferences. This even includes support with defense, remediation and forensics.

### benefits

**Threat Manager** provides affordable protection for your overall network with no upfront investment required, enabling you to:

- + improve network security by identifying threats and vulnerabilities that evade perimeter and endpoint defenses
- + meet regulatory compliance by identifying incidents and vulnerabilities that could impact compliance-relevant network assets
- + eliminate false alarms typically associated with intrusion detection technology

### about Loop

Loop Enterprise Inc. was founded in March 1995 in response to the IT industry demand for a single-point solution provider who understands workflow. Loop's team of professionals focus on implementing hardware/software solutions that increase productivity and minimize downtime and cover all technologies, from networking and server infrastructure to overall workflow.

Over the years, Loop has expanded its product and service offerings and continues to do so today in order to proactively respond to client needs, providing them with products and services that ensure optimal and uninterrupted levels of productivity.

Loop also specializes in customized training for software applications and has several certified trainers on staff as well as a network of training partners. Training needs are assessed on a client by client basis and the content and format of each training session is developed to address the client's specific requirements.

Loop is not only an IT product and service provider, Loop is an IT partner who strives to deliver a personalized service to each and every client and become part of the client's ongoing success.
