

training services

why is training important?

You can be running all the latest software applications on all the latest workstations, but what they produce is only as good as the skills of the people using them.

Software development is a fast moving industry and therefore, always changing. It is more vital than ever for individuals and businesses to have access to high quality software training to stay competitive.

Lack of software knowledge is cited as the most common cause when a project fails. Yet it's one of the most important steps in assuring success.

where do Loop training workshops take place?

You can choose to come to our Vaughan, Ontario location, or we can carefully plan a training course at your office, or other facility of your choice.

why should I choose Loop?

Loop will assess the training needs of your group and develop a customized program to be delivered by an experienced instructor.

We feature small class sizes, current technology laptops, great learning environments, certified trainers, high-quality courseware, and careful attention to your specific needs and experience level.

what software application training does Loop offer?*

- + Adobe Creative Suite family of products
- + Apple Operating Systems (Tiger, Leopard)
- + Apple Final Cut family of products
- + Extensis Digital Asset Management applications
- + Extensis Font Management applications
- + Windows Operating Systems (XP, Vista)
